CURRENT PRICE LIST No. 412—Issued 29th May, 1941

Manganese Sulphate

Agronomists, both scientific and practical, have for some time felt that the theory that practically all soils contained sufficient of those elements, other than Nitrogen, Potassium and Phosphorous, which plants need for normal growth, could no longer be accepted and that there was room for research into the benefits which might be derived from applications of one or more of these elements on particular soils.

The incidence of disease, where a particular crop is grown on the same land over a long period of time or in some cases even when it is grown for the first time, has led to the belief that the inherent resistance of that crop to the disease is being undermined by a deficient food supply.

It has long been accepted in vegetable growing that without an adequate supply of animal manures economic production of a high quality product free from disease was not practicable. Why? In the opinion of the writer the answer is not to be found wholly in the theory of organic material and all that that implies because, from practical experience, on soils composed largely of decomposed vegetation and mechanically perfect, results in many instances indicated the same deficiencies as on soils of the same geological origin and formation but devoid of the accumulated organic material.

Two obvious deductions can be derived from these observations:

(1) Vegetative humus cannot replace animal manures.

(2) Vegetative humus, *formed in situ*, will be deficient in those very elements in which the original soil was deficient. In other words, the plants which established themselves originally on that particular soil were such as would thrive with a minimum of the element in which the soil was deficient.

The answer surely lies in the second deduction, which means that the ani-

(Continued on page 5)

ROSES

Which is the best time for Planting?

We find from our own experience (and letters from our large clientele confirm this) that rose trees planted before they are fully dormant do not give such good results as those which have been allowed to develop good hard wood. Unfortunately during periods of abnormally high winter temperatures such as we have experienced during the past few seasons the trees do not become dormant until very late—well into August. Normally by mid-June they should be dormant and the wood well hardened.

We suggest that our customers place their orders early but ask for delivery not before mid-June or preferably during July or August. In the past some gardeners have insisted on May delivery or the first part of June. Sometimes the results have been disappointing. We realise that the desire to get the trees planted before the school holidays has much to do with this ill-advised early planting.

TERMS OF BUSINESS

NON-WARRANTY

We give no guarantee expressed or implied (and none of our representatives is authorised to vary this condition in any way) as to description, quality or productiveness or as to any other matter of any seeds, bulbs or plants we sell, and we are not in any way responsible for them or in respect of the crop or failure of the crop. All quotations are given and orders accepted only on the understanding that these conditions are agreed to.

KOOPVOORWAARDES

Ons gee geen direkte of indirekte waarborg (en geneen van ons verteenwoordigers is gemagtig om hierdie voorwaarde te verander nie) met betrekking tot beskrywing, kwaliteit, produktiwiteit of enige ander saak omtrent die saad, bolle of plante wat ons verkoop nie, en ons is op generlei wyse aanspreeklik vir hulle of vir die oes of mislukking van die oes nie. Alle prysopgawes word verstrek en bestellings uitgevoer mits daar met hierdie voorwaardes ingestem word.

C. STARKE & CO. LIMITED.

PRICES

We quote free on rail without engagement, subject to crop failure and being unsold on receipt of order. All previous issues of this Price List are hereby cancelled. Generally we are able to adhere throughout the season to the prices quoted in our Annual General Catalogue; where necessary however they may be varied by alterations published in this Price List.

FORWARDING

Unless instructed to the contrary we will send goods the cheapest way. Postage must be included when cash is sent and where goods are to be consigned to a siding railage must be added. In the event of insufficient money being sent with order we reserve the right to reduce the goods sent accordingly. Only South African grown seeds may be sent by Agricultural Post. By passenger train seeds travel at half Parcels Rate.

SUBSTITUTIONS

When varieties ordered are not available we use our discretion and send suitable substitutes if possible. These are sent for your approval but should they not meet with your requirements they should be returned immediately.

PACKING OF SEEDS

We use the best materials but do not charge for packing unless special packing is asked for.

PACKING OF PLANTS

We charge this up at cost price. Our packing is adequate protection for the rail or post journey as the case may be, but we cannot be held responsible for damage in transit or through delays on the journey.

WHERE TO ORDER

Orders may be sent either to Head Office at Mowbray or to our Pretoria Branch. When an account has once been opened at one of our establishments it is advisable always to order from that branch. Where prices are quoted as "Pretoria Prices" or "Mowbray Prices" customers should remember to allow 1/6 per 100lbs. extra for railage on seeds between branches if they place their order with the other Branch. This does not apply to seeds quoted at more than 30/- per 100lbs., which we will supply from either Branch without additional charge.

POSTAL RATES

PARCELS:

Ordinary Parcels for places within the Union, South-West Africa and Colony of Mocambique:
Not exceeding 4oz. 2d.
Not exceeding 8oz. 4d.
Not exceeding 1lb. 6d.
For every additional 1lb. or portion thereof 6d.
Bechuanaland Protectorate 6d. per lb.
 (Kasane 1/- per lb., Ghanzi 9d. per lb.)
Southern Rhodesia 9d. per lb.
Northern Rhodesia 1/- per lb.
United Kingdom 9d. per lb.
British Commonwealth, Protectorates, Possessions and Foreign Countries: See Post Office Guide.

Agricultural Parcels addressed to any place within the Union (South African Products only):
Not exceeding 1½lb. 3d.
Not exceeding 3lb. 6d.
Not exceeding 6lb. 8d.
Not exceeding 9lb. 10d.
Not exceeding 11lb. 1/-

Agricultural Parcels to Bechuanaland Protectorate (excepting Kasane and Ghanzi):
Not exceeding 3lb. 1/-
Not exceeding 7lb. 1/6
Not exceeding 11lb. 2/-

POSTAL "CASH ON DELIVERY" FEES.

For trade charges up to and including £1 1/-
For every additional £1 or part thereof 3d.

RAIL RATES

Seeds declared to be for sowing purposes may be sent per passenger train at half the Parcels Rate. Although most South African grown cereals are carried by goods train at very cheap rates, it is as well to warn clients that imported seeds of many kinds are not always admitted under Rate 7, which is the rate for "Seeds for Farm Sowing." A list of seeds is published in the Railway Tariff Book and only seeds which fall under one of those heads are accepted at Rate 7. All other seeds are carried at Rate 1 unless especially provided for under another rate.

FARM SEEDS

For nearly 40 years Starke's have had a name for reliability and fair dealing and on this essential foundation we have built up a Union-wide trade in Agricultural Seeds of high quality.

Our Seed-cleaning Plant is the largest in South Africa; and many and varied are the types of machines used to obtain those first-grade samples for which we are so well known.

To make farming pay it is more than ever necessary to use the best seed and so obtain the highest yields.

Good Seed is not expensive—less need be sown per acre.

MANGANESE SULPHATE—(contd.)

mal manure usually derived from outside the deficient area, or from animals within the area, but fed on food-stuffs from outside, contains the deficient element or elements. Recent research carried out by the Department of Agriculture at the new experimental station in the Cape Flats indicates that there is a deficiency of Manganese in this area.

Manganese apparently acts as a catalyst in the process of chlorophyll formation and a deficiency is usually indicated by such diseases as Chlorosis, blight, rusts and generally in a premature breakdown and ripening of the leaf structure of the plant. Although the experiment is only in the initial stages it would appear that the soils likely to be deficient are those where the pH factor is well over 7, or soils over rich in lime, particularly where they have only recently been brought under cultivation. Long-continued applications of stable manure and improved drainage have probably brought about an improvement in soils which originally were deficient but now produce good crops. On the other hand once fertile areas soon cease to produce profitable crops when the small natural supply of manganese has been used up, particularly when the manures applied are for one reason or another themselves deficient in this element.

Although it is not always easy from casual observation to know when a crop is suffering from a deficiency of manganese or not, the following crops have responded wonderfully to applications of this element—potatoes, mielies, beans and beetroot.

On the particular farms where the writer has conducted experiments, potatoes, mielies and beans were quite unprofitable crops until the deficiency was made good. The amount of man-

ganese required by most crops is very little, indeed it represents about 1-200th of the amount of potash or phosphates necessary for normal growth. That is to say where 800lbs. of superphosphate would be considered a heavy dressing per morgen to supply the necessary phosphates, 4lbs. of manganese sulphate will supply the necessary manganese. The impossibility of distributing so small a quantity evenly throughout the root feeding area of the soil is immediately apparent.

Fortunately it has been found that a solution sprayed on the foliage of the plants is immediately effective and visible results can be observed within four days. Spraying should be done in the case of beans and potatoes soon after germination and again when the plants commence to flower. With other crops as soon as the foliage is of a convenient size to catch at least a fair proportion of the spray yet not when as large as to present difficulty in wetting all of the foliage with the limited amount of solution available. The solution should not be stronger than 1 per cent., that is 1lb. of manganese sulphate dissolved in 10 gallons of water. Where the plants are already large, as for instance at the second spraying, it may be advantageous to reduce the strength to $\frac{1}{2}$ per cent., giving a greater volume of solution for a given area.

An area of 100 square yards, or say 200 yards of crop-row where the plants are in rows, should require about a quart of water in which is dissolved approximately $\frac{1}{2}$ oz. of manganese sulphate for the first application; double the amount of water for the second application. EDEN.

N.B.—STARKE-AYRES are now able to supply Manganese Sulphate at the following prices: 1lb. 1/-; 5lbs. 3/-; 25lbs. 13/-; 100lbs. 50/-; f.o.r. Rosebank Station.

LUCERNE (Prices for large quantities) on application.

Sunflower, White, Sometimes available	—	—	—	—	—

NITRAGIN is prepared for the following groups of seed. (In ordering always state kind of seed to be inoculated).

Some growers report excellent results from using milk to moisten seed before applying the inoculant.

Group A
Alfalfa
Hubam
Burr Clover
Sweet Clover

Group B
Red Clover
Mammoth Clover
White Clover
Alsike
Crimson Clover
Subterranean Clover

SOIL INOCULATORS FOR LEGUMINOUS CROPS

Group C
Garden Pea
Field Pea
Sweet Pea
Vetch
Horse Bean

Group D
Navy Bean
String Bean
Wax Bean
Kidney Bean
Garden Bean

Group E
Cowpea
Lima Bean
Japan Clover
Peanut
Velvet Bean

Group S
Soy Bean
and
Other Legumes

Price per tin 5/-, postage 6d. extra.
Pretoria Price 5/- per tin, postage 6d. extra.

Each tin contains sufficient to inoculate at least one bushel of seed

SEED POTATOES

(B)

Owing to war conditions we did not this past season import Scotch grown seed tubers as usual. Following up our successful importation from Canada in 1939 we again landed a shipment from that Dominion in December 1940, consisting of Green Mountain and Kathadin. During the coming winter "first-from-imported" seed grown from this importation should be available.

Meantime we offer, as and when available, South African grown seed-tubers of the following varieties. Prices on application.

We pack in cases of 66lbs. nett weight or in bags of 150lbs. and are prepared to quote for delivery f.o.r. Rosebank, subject to being unsold on receipt of order.

Annan Banner, main-crop, white skin, very few small tubers, good yielder.

Arran Chief, main-crop, white skin, does well along South-West coastal districts.

Flourball, early main-crop, roundish, pink skin, white flesh, reliable variety.

Green Mountain, very much like Ragis Zehn, flesh white and mealy; a Canadian variety that does well in Western Province.

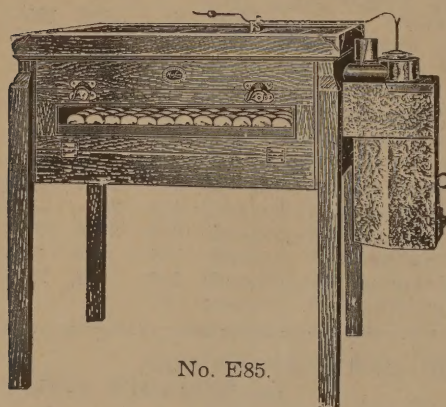

King George V, splendid variety for Western Province, prolific, white skinned oval potato.

Kathadin, fairly late, shallow eyes, buff skin, white flesh.

President, a Canadian variety similar to Up-to-Date in colour, shape, texture and maturity.

Ragis Zehn, main-crop, rough white skin, does well in the Boland.

Up-to-Date, main-crop, oval, white skin, a favourite variety in summer rainfall areas.

No. E85.

<i>Acacia longifolia</i> , ornamental, yellow flowers	1/-	1/3	4/-
<i>Acacia melanoxylon</i> , Blackwood, for timber and shade	—	1/-	2/6
<i>Acacia mollissima</i> , Black Wattle, for tanning bark....	—	—	1/3
<i>Acacia pycnantha</i> , Golden Wattle, smallish tree	—	—	1/3
<i>Acacia saligna</i> , Port Jackson Wattle, quick-growing	—	—	1/3
<i>Atriplex nummularia</i> , Old Man Salt Bush, fodder bush	—	—	1/6
<i>Cedrus Deodara</i> , The Deodar Cedar	1/6	5/-	17/6
<i>Cupressus arizonica</i> , hardiest cypress. Imported 2/6 oz., Local	1/-	1/3	4/-
<i>Cupressus macrocarpa</i> , hedges and shelter rows	1/6	5/-	17/6
<i>Cupressus sempervirens</i> var. <i>horizontalis</i> , Spreading Cypress	1/-	2/6	8/6
<i>Cupressus sempervirens</i> var. <i>stricta</i> , Pyramidal Cypress	1/-	2/6	8/6
<i>Cytisus proliferus albus</i> , Tagasaste, useful for fodder	1/-	2/6	8/6
<i>Dodonea viscosa</i> , hedge plant for mild areas	1/6	5/-	17/6
<i>Eucalyptus calophylla</i> , White-flowering Gum	1/6	5/-	17/6
<i>Eucalyptus citriodora</i> , Lemon-scented Gum	1/6	5/-	17/6
<i>Eucalyptus cladocalyx</i> , the well-known Sugar Gum	1/6	5/-	17/6
<i>Eucalyptus colossea</i> syn. <i>E. diversicolor</i>	—	—	—
<i>Eucalyptus coriacea</i> , frost hardy, for well-watered areas	1/6	5/-	17/6
<i>Eucalyptus crebra</i> , Narrow-leaved Ironbark	1/6	5/-	17/6
<i>Eucalyptus diversicolor</i> , Karri, rapid grower	1/6	5/-	17/6
<i>Eucalyptus ficifolia</i> , Red-flowering Gum	2/-	6/6	24/-
<i>Eucalyptus gomphocephala</i> , Tuart, for coastal areas	1/6	5/-	17/6
<i>Eucalyptus Lehmanni</i> , Bushy Cornuta, for shelter rows	1/6	5/-	17/6
<i>Eucalyptus leucoxylon</i> , for hot coastal areas	1/6	5/-	17/6
<i>Eucalyptus longifolia</i> , Woolly Butt, straight grower	1/6	5/-	17/6
<i>Eucalyptus maculata</i> , Spotted Hickory	1/6	5/-	17/6
<i>Eucalyptus melliodora</i> , Yellow Box, thrives in O.F.S.	1/6	5/-	17/6
<i>Eucalyptus microcorys</i> , Tallowwood, splendid timber	1/6	5/-	17/6
<i>Eucalyptus resinifera</i> , Forest Mahogany, moist regions	1/6	5/-	17/6
<i>Eucalyptus robusta</i> , Swamp Mahogany, rapid grower	1/6	5/-	17/6
<i>Eucalyptus rostrata</i> , Red Gum, very reliable	1/6	5/-	17/6
<i>Eucalyptus saligna</i> , rapid grower, straight timber	1/6	5/-	17/6
<i>Eucalyptus sideroxylon</i> , Red Ironbark, recommended	1/6	5/-	17/6
<i>Eucalyptus tereticornis</i> , very similar to <i>E. rostrata</i>	1/6	5/-	17/6
<i>Eucalyptus torquata</i> , small, ornamental	½oz. 1/-	3/-	10/-
<i>Eucalyptus viminalis</i> , Willow Gum, rapid grower	1/6	5/-	17/6
<i>Ginkgo biloba</i> , ornamental, deciduous, nuts edible	6d.	1/-	3/6
<i>Grevillea robusta</i> , Silky Oak, handsome tree	2/-	6/9	25/-
<i>Jacaranda mimosaeifolia</i> , blue flowers, deciduous	2/-	6/9	25/-
<i>Juniperus virginiana</i> , Pencil Cedar, very hardy	1/-	2/6	8/6
<i>Leptospermum laevigatum</i> , Australian Myrtle	1/6	5/-	17/6
<i>Ligustrum lucidum</i> , Chinese Privet, hardy	1/-	2/6	8/6
<i>Pinus canariensis</i> , Canary Island Pine	1/6	5/-	17/6
<i>Pinus halepensis</i> , Jerusalem Pine	1/-	2/-	8/6
<i>Pinus insignis</i> (syn. <i>P. radiata</i>), fine timber tree	1/6	5/-	17/6
<i>Pinus longifolia</i> , Chir Pine, good timber	1/6	5/-	17/6
<i>Pinus patula</i> , ornamental, drooping foliage	1/6	5/-	17/6
<i>Pinus pinaster</i> , Cluster Pine, sow in situ	—	1/-	2/-
<i>Pittosporum eugenoides</i> , metallic green foliage	2/6	8/6	—
<i>Pittosporum undulatum</i> , ornamental, glossy leaves	1/6	5/-	17/6
<i>Prosopis juliflora</i> , Mesquite or Algaroba; fodder pods	1/-	2/6	8/6
<i>Robinia pseudacacia</i> , deciduous; good fencing posts	1/-	2/-	4/-
<i>Sterculia platanifolia</i> , Chinese Parasol, deciduous	1/3	3/6	12/6
<i>Telopea speciosissima</i> , Waratah; Australian protea; red flower....(12 Seeds for 4/-)			

TREE AND SHRUB SEEDS

NATIVE SPECIES.

Most varieties can be had in 6d. packets.				$\frac{1}{16}$ oz.	$\frac{1}{2}$ oz.	1 oz.
<i>Adenandra fragrans</i> , red and white; shrub		Pkt. 1/-	4/-	15/-	—	—
<i>Adenandra uniflora</i> , dwarfier than above		Pkt. 1/-	2/-	—	—	—
<i>Aitonia capensis</i> , Klapperbos, beautiful shrub			1/-	2/6	8/6	—
<i>Aulax cneorifolia</i> , handsome yellow-green shrub			(12 Seeds for 2/6)

DAHLIAS

We have a very fine collection, and certainly there is none in this country more up-to-date. We are constantly introducing new varieties and weeding out those that have been superseded.

For early orders (August to September) tubers will be sent while they last, and thereafter Green Plants will be available from the beginning of October.

Green Plants give very good results and we have for many years successfully packed these for despatch to all parts of the Union.

Prices: As indicated against each variety; all varieties are 3d. each less if included in a dozen, assorted or otherwise.

Packing and Postage Charges for all classes of Dahlias are as follows: 1/6 per doz.; 1/- per 1/2-doz.; 9d. per 1/4-doz. or less. This includes packing and postage within the Union only; for Territories outside the Union, where Agricultural Post Rates do not apply, it would sometimes be cheaper to despatch by Rail.

Recent Introductions are marked thus †

Latest Introductions are marked thus *

Owing to war conditions we may not be in a position to offer Imported Tubers in December this year as has been our custom in the past.

SPECIAL OFFER 4121—We have a number of first-class varieties in each class for which we have no space in this list. These, together with many varieties here priced, we are prepared to supply in collections at much reduced rates, but selection of varieties must be left to us.

"Liesbeek" Assortment: 12 Dahlias (named) for 12/- (Post paid 13/6).

"Rosebank" Mixture: 12 Dahlias (unnamed) for 9/- (Post paid 10/6).

CLIMBERS

PLEASE NOTE!

When ordering Climbers it is advisable to use the prefix "Cl." before the name: for example "Cl. Mrs. G. A. van Rossem." Many varieties are obtainable both in the Dwarf and Climbing forms, and by using the prefix there is less chance of misunderstanding and mistakes arising.

STANDARDS

The following varieties have been budded for 3-foot Standards.

Prices are for local delivery or f.o.r. Rosebank. These plants cannot be sent by post owing to the length being greater than the regulations allow.

Strong 2-year plants. Well-formed heads on 3ft. stems. 7/6 each.

Betty Uprichard.
Columbia.
Condesa de Sastago.
Elite.
Etoile de Holland.
Glory of Holland.
Golden Dawn.
J. Otto Thilow.
Korovo.
Luis Brinas.
Malar Ros.
Margaret McGredy.
Mrs. Geo. Shawyer.
Ophelia.
Radiance.
Rapture.
Ruby Mainwaring.
Souv. de Denier van der Gon.
Talisman.
Westfield Star.

A modern decorative and exhibition rose with high pointed centre.

GOOD VARIETIES FOR THE AMATEUR

If you are not a Rose grower, and are in doubt which varieties to select from the General List, leave the selection to us and you will not be disappointed; or select from the following specially recommended reliable varieties.

Here is a good list for the beginner: all are good growers, free flowering, and covering most of the available shades of colour, all distinct. From these you can make your own choice with every assurance of success. We have fair stocks of these but, in case we are sold out of any particular variety on receipt of your order, we will send you the very best substitute.

RECOMMENDED LIST INCLUDES ALL SHADES

2/- Varieties

Autumn. Apricot-gold.
Barcelona. Deep crimson.
Caledonia. Pure white.
Catherine Kordes. Scarlet shaded crimson.
Clovelly. Pink.

VEGETABLE TRANSPLANTS

Country orders are packed with the greatest care and almost always reach their destination in good condition. We cannot, however, be responsible for loss due to delays, bad handling or bad weather en route.

These are available in season, but we cannot be sure of having all varieties ready for dispatch at any particular date. Unless customers specially instruct us not to, we will substitute some other variety which we think will be suitable when the one ordered is not ready.

GRAPE VINES, CITRUS AND OTHER FRUITS

We do not grow Grape Vines, Oranges, Naartjies, Apples, Pears, Plums, Peaches, etc., etc., but can obtain them from the very best growers at standard prices.

GARDEN HOSE INSECTICIDE SPRAYER

The Arnold Garden Hose Insecticide Sprayer is a simple, practical and highly efficient mixing and spraying device which is attached to your garden hose in place of the regular nozzle.

The complete Arnold standard sprayer consists of a Non-Leak Shut-Off, a Transparent Cartridge Chamber with Metal Threaded Ends, and a twelve-inch Spraying Nozzle, as illustrated, all metal parts Chromium plated.

Used with Arnold Cartridges the Arnold Sprayer provides a suitable spray for the control of fungus growths, plant diseases and both sucking and chewing insects.

Under normal conditions each Arnold Cartridge makes the equivalent of from five to six gallons of correctly proportioned hand-mixed spray.

ARNOLD DOUBLE CARTRIDGE CHAMBER FOR DUAL CONTROL

The use of two cartridge chambers connected together by means of a special coupling with two different types of cartridges, one in each chamber, provides a simple, effective way of controlling a great many pests at one spraying.

The two chambers may also be used with the same type of cartridge in each chamber. In this manner double the strength of solution may be obtained whenever required.

ARNOLD SUB-SURFACE FEEDER AND IRRIGATOR

This 36-inch pipe or needle is perforated at the pointed end. With a Plant Food Cartridge in the chamber, it is attached to the cartridge chamber of sprayer in place of Spraying Nozzle, inserted into ground to desired root depth and allowed to flow, thus providing both water and fertilizer for root feeding and eliminating waste from evaporation and surface run-off.

A comprehensive Spraying Guide and complete directions for using the Arnold Sprayer, Cartridges and Acces-

sories to their best advantages is packed with every sprayer.

ARNOLD EXTENSIONS

Arnold (36inch) angle and straight extensions are for increasing the spraying range when it is desired to spray tall shrubbery, young trees, rambler roses, etc. As many as three can be used at once thus lengthening the spraying range from three to nine feet.

PRICES

Arnold Standard Sprayer, shut-off, transparent cartridge chamber with metal threaded ends, 12-inch angle nozzle, chromium plated	25/-
Arnold Special Sprayer, shut-off, 12-inch nozzle, brass finish, transparent cartridge chamber	17/6

ARNOLD CARTRIDGES

Arnold Trio-o-Spray. This cartridge contains Nicotine, Lead Arsenate and Copper Sulphate.

Arnold Jap-o-Spray, for the control of Japanese Beetles, Rose Chafers and hard shell insects.

Arnold Arsen-o-Spray, for control of Curculi, Leaf-eating Caterpillar, Sawfly, Stalk Borer, Japanese Beetle, Rose Chafer, Berry Moth, Flea Beetle, Leaf Roller, Horn Worm, White Pine Weevil, Spruce Budworm, Blister Beetle, Thistle Butterfly and Slugs. Cartridges contain 80 per cent. active ingredients and produce a spray equivalent to approximately 3lbs. of Arsenate of Lead mixed with 100 gallons of water. When two cartridges are used in the double cartridge chamber the spray produced is equivalent to 6lbs. mixed with 100 gallons of water.

Arnold Fung-o-Spray. Will aid in the control of certain leaf spots or blights such as are controllable by a mild or weak Bordeaux Mixture.

Arnold Sulph-o-Spray, for control of Mildew, Rust, Canker, Scab, Cedar Rust, Anthracnose, Brown Rot, Spruce Mite and Red Spider.

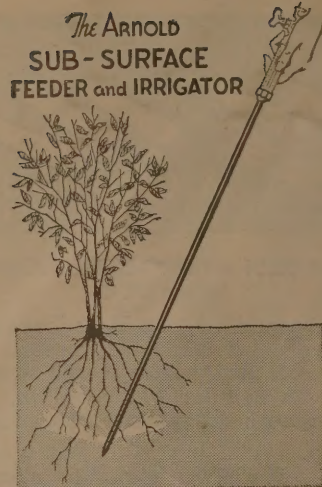

Arnold Nic-o-Spray, for control of Lace Bug, Leaf Miner, Thrips, Pear Pysalla, Leaf Hopper, Midge, Mealy-bug, Fern Scale, White Scale, Aphis and Ants.

Arnold Pyr-o-Spray. A Non-Poisonous Material for control of Blister Beetle, Thrips, Stalk Borer, Rose Chafer, Japanese Beetle, Black Squash Bug, Lace Bug, Cutworm, Aphis, Leaf Hopper.

Arnold Dorm-o-Spray, a miscible oil spray for control of San Jose Scale and Euonymous Scale during the dormant period of flowers and shrubs.

Arnold Plant Food Spray, for plant feeding. Contains a scientifically balanced food consisting of nitrogen, phosphoric acid and potash.

Arnold Cleanswell Auto Wash, for washing automobiles. Used same as any of the above cartridges in regular Arnold Sprayer or in special Arnold Auto Wash Sprayer.

OTHER PRICE LISTS

In the July, 1940, issue of KUDU NEWS we published a descriptive list of Flowering Trees and Shrubs, Herbaceous and Perennial Plants, Palms, Conservatory Plants and Ferns, Hedge and Climbing Plants. Copies of these booklets are still available and will be posted on application.

In this present issue we are publishing an **Abbreviated Rose List**. For those rosarians who would prefer fuller descriptions we have reserved a limited number of **1940 Rose Lists** containing more detailed variety descriptions and copies of these also will gladly be sent on application while the supply lasts.

ANDER PRYSLYSTE

In die Julie 1940 uitgawe van KUDU NEWS het ons 'n beskrywende lys gegee van blomdraende bome en gewasse, kruidagtige en meerjarige plante, palms, somerhuis plante, varings, heinings en klimop-plante. Eksemplare van hierdie uitgawe is nog verkrygbaar en sal gratis gestuur word op aanvraag.

In hierdie uitgawe publiseer ons 'n **Beknopte Rose Lys**. Vir ros liefhebbers wat vollediger beskrywings verlang, het ons 'n beperkte aantal van die 1940 **Rose Lys** uitgehou wat meer besonderhede omtrent elke variëteit bevat. Hiervan sal ook graag gestuur word op aanvraag.
